INTRODUCTION

Section 113(j)(1) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. Section 9613(j)(1), provides that judicial review of any issues concerning the adequacy of a response action shall be limited to the administrative record compiled for the site. CERCLA, as amended by the Superfund Amendments and Reauthorization Act (SARA), requires the U.S. Environmental Protection Agency (EPA) to compile documents which form the basis for the selection of the remedial CERCLA and SARA response actions. These supporting documents form an "administrative record" (AR) which the Agency must provide for public review. The ARs are maintained at relevant EPA Regional Offices as well as "at or near the facility at issue."

The following AR Index was compiled in accordance with Office of Solid Waste and Emergency Response Directive Number 9833.3A-1, "Final Guidance on Administrative Records for Decisions on Selection of CERCLA Response Actions" (December 3, 1990). Documents listed as bibliography sources in response decision documents may not be listed in the AR Index. An index to the "Compendium of CERCLA Response Selection Guidance Documents" is enclosed in the AR. The AR file is compiled as documents related to the response action are being generated. All documents that are clearly relevant and non-privileged are placed in the record file, entered into the index, and made available to the public as soon as possible. The documents included in the index are predominately arranged in chronological order. EPA may send supplemental AR volumes and indexes to the designated repository. These supplements should be placed with the initial record file. Documents attached to or referenced in the Amended Record of Decision are incorporated by reference into the AR.

The AR file must be indexed. The index plays a key role in enabling both lead agency staff and members of the public to help locate and retrieve documents included in the record file. In addition, the index can be used for public information purposes or identifying documents located elsewhere, such as those included in the compendium of guidance documents. The index also serves as an overview of the history of the response action at the site. The AR Index helps readers locate and retrieve documents in the file. It also provides an overview of the response action history. The index includes the following information for each document:

- **AR Page No.** - The sequential numbers stamped on each page of the AR. The six-digit numbers are located in the upper right-hand corner of each page.
- **Document Date** - The date the document was published and/or released. "Undated" means no date was recorded.
- **No. of Pages** - Total number of printed pages in the document, including attachments.
- **Author** - Name and title of the originator.
- **Company/Agency** - Originator's affiliation.
- **Recipient** - Name, title, and affiliation of the recipient.
- **Document Type** - General identification, e.g., correspondence, Remedial Investigation Report, Record of Decision, etc.
- **Document Title** - Descriptive title or synopsis.
